

Our Products

**Hundreds of Colours and Surfaces. Millions of Opportunities.
We make it possible for you to Season the Design.**

Metalcolour produces the widest range of film-laminated sheet steel available on the market – we have hundreds of colours and patterns to offer. We also produce pre-painted steel in a very flexible way, with both small and large quantities available.

Setting the Standard

All around the world, Metalcolour's sheet steel can be found in ships, cars, lifts, refrigerated display cabinets, furniture, doors, vehicle cabins and so on, from Scandinavia to America and Asia.

The production is carried out in our highly versatile production plants in Ronneby, Sweden, and Nykøbing, Denmark, where we have accumulated more than 30 years of experience regarding film lamination and painting of sheet steel and aluminium.

Today, we are setting the standard. Metalcolour is probably the most flexible producer of pre-painted sheet steel and the largest Scandinavian manufacturer of film-laminated sheet steel and the world's leading supplier for the marine sector. We have achieved this position by meeting customer demands for quality, flexibility and reliability of supply.

If you are interested in trying any of Metalcolour's products, you can count on our support from start to finish. We will make sure you find the product that best suits your business and helps make your company more competitive.

Certificates

Metalcolour products are approved by leading fire classification societies. Metalcolour itself is certificated in accordance with ISO standards.

The majority of Metalcolour's products are certified for fire-resistance by leading societies. These products are well suited to environments where especially strict demands are placed on fire security and food safety, for example in marine interiors, such as walls and ceiling panels for ship cabins, bathrooms and showers, as well as furniture and doors.
